

SERVICE OVERVIEW

Environmental Scans & Regional Assessments

Search broadly and deeply for optimal decisions

The Challenge

Expanding into new regions or evaluating new supplier markets requires understanding the full landscape — political stability, regulatory environment, infrastructure, labor conditions, and more. Surface-level assessments miss critical factors that can derail projects or create unexpected liabilities.

The Intelleges Solution

Intelleges provides comprehensive environmental scanning capabilities that search broadly across multiple dimensions and deeply into specific risk factors. The platform aggregates data from diverse sources to support informed decision-making.

Key Capabilities

- **Multi-Dimensional Scanning:** Assess regions across political, economic, social, technological, environmental, and legal (PESTEL) dimensions with structured frameworks.
- **Geopolitical Risk Monitoring:** Track political stability, civil unrest, sanctions developments, and regulatory changes that could impact operations in target regions.
- **Infrastructure Assessment:** Evaluate transportation networks, utilities reliability, telecommunications, and logistics capabilities in potential supplier locations.
- **Labor & ESG Factors:** Assess workforce availability, labor practices, environmental regulations, and social responsibility factors for responsible sourcing.

Results & Outcomes

- ✓ Identified political instability risks before committing to new supplier region
- ✓ Discovered infrastructure limitations that would have impacted delivery timelines
- ✓ Documented ESG factors to support responsible sourcing commitments
- ✓ Provided leadership with comprehensive data for strategic sourcing decisions
