Track Expirations, Risk Indicators & Quality Data

Automated monitoring across your entire supply base

The Challenge

With hundreds of suppliers, thousands of certifications, and constantly changing risk factors, it's humanly impossible to track all expirations and ensure data quality manually. Spreadsheets become outdated the moment they're created. Collecting data and documents is only the beginning — the real challenge is maintaining currency and visibility.

The Intelleges Solution

Intelleges provides continuous, automated monitoring of expiration dates, risk indicators, and quality metrics across your entire supply base. Only through automation, artificial intelligence, and big data analysis can this challenge be addressed at scale.

Key Capabilities

- **Expiration Dashboard:** Real-time visibility into all tracked certifications, insurance policies, and compliance documents with status indicators (current, expiring soon, expired).
- **Configurable Alert Thresholds:** Set alerts at 90, 60, 30, and 7 days before expiration. Configure escalation paths when renewals are overdue.
- **Risk Indicator Monitoring:** Track supplier financial health, delivery performance, quality metrics, and external risk factors with automatic alerts when thresholds are breached.
- **Quality Data Integration:** Pull quality metrics from inspection systems, track non-conformances, and correlate quality data with supplier risk profiles.

Results & Outcomes

- ✓ Reduced expired certificates from common occurrence to under 10%
- ✓ Prevented use of suppliers with lapsed insurance coverage
- ✓ Identified supplier financial distress before delivery disruptions occurred
- ✓ Maintained current, accurate supplier data without manual spreadsheet updates
