

Audit-ready compliance management

For highly regulated supply chains and enterprise operations

For more than 25 years, Intelleges has helped organizations meet complex regulatory, contractual, and supplier compliance requirements across global operations. Regulations, reporting requirements, supply chains, technology platforms, governments, and audit methodologies have changed, yet one thing has remained constant: our clients continue to meet their obligations.

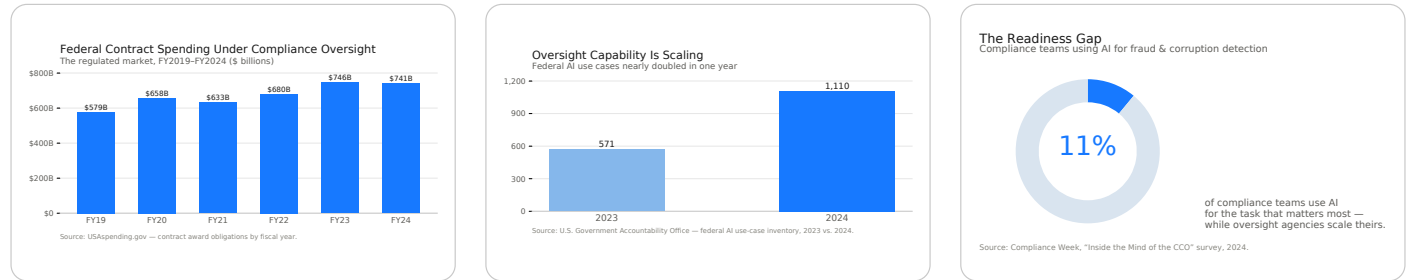

In 25 years, nothing has happened.

And we want to keep it that way.

In compliance, "nothing happened" means no major findings, no contract disruptions, no supplier surprises, no regulatory penalties, and no preventable audit failures.

Why the problem is getting harder

Federal compliance has become a scale, visibility, and readiness challenge. The regulated market is large, oversight capability is increasing, and many organizations are still operating with fragmented compliance processes.

The readiness gap

While oversight agencies rapidly expand their ability to analyze large volumes of data, many organizations continue to rely on spreadsheets, email chains, disconnected systems, and manual compliance processes. The result is a growing readiness gap between the sophistication of oversight and the maturity of internal compliance operations. Intelleges helps close that gap by creating structured, auditable, and defensible compliance ecosystems that connect supplier documentation, procurement evidence, certifications, reporting, and audit readiness.

Solution: Intelleges

Structured data. Connected evidence. Continuous audit readiness.

ONE SYSTEM. ONE SOURCE OF TRUTH.

What Intelleges does

Intelleges helps organizations become and remain audit ready, compliance automated, enterprise integrated, data harmonized, supply chain connected, and platform-supported.

Audit Ready

Required documentation, certifications, attestations, and supporting evidence are available when needed.

Compliance Automated

Manual collection, validation, tracking, and reporting work is reduced through structured workflows.

Enterprise Integrated

Compliance processes connect with procurement, supplier management, and enterprise operations.

Data Harmonized

Fragmented supplier and compliance information becomes structured, usable data.

Supply Chain Connected

Organizations gain visibility across supplier networks and critical compliance relationships.

Trusted Platform

Systems are designed for organizations where compliance is mission-critical.

You certify. We make certain the data behind the certification holds.

Core Solutions (PODS & SODS)

Intelleges brings procurement, supplier onboarding, documentation, certifications, audit evidence, and enterprise controls into a practical compliance management framework.

Purchase Order Documentation System (PODS)

PODS addresses documentation and justification requirements surrounding procurement activities.

- Sole source justifications
- Purchase order documentation
- Audit evidence collection
- Purchase order cardinality
- Accrual and purchase order delay analysis

Supplier Onboarding & Documentation System (SODS)

SODS addresses one of the most persistent challenges in enterprise compliance: obtaining, validating, and maintaining supplier information.

- Supplier onboarding and supplier portal
- Representations and certifications
- ITAR and FOCI compliance
- Buy American Act compliance
- Single Sign-On and Role-Based Access Control

Connecting the dots

Most organizations manage compliance through disconnected spreadsheets, emails, portals, databases, and manual processes. Intelleges connects these activities into a unified compliance ecosystem.

The diagram below illustrates how supplier onboarding, procurement documentation, certifications, reporting, risk management, and audit evidence are connected within a single compliance framework.

A Unified Compliance Ecosystem Enables Organizations To:

- Assess supplier risk
- Monitor compliance obligations
- Identify documentation gaps
- Support audit readiness
- Improve reporting accuracy
- Reduce administrative burden
- Connect procurement, compliance, suppliers, and audit evidence

The result is greater visibility, lower risk, and reduced cost of compliance.

Industries served

Intelleges supports organizations operating in highly regulated environments where compliance, supplier documentation, and audit evidence must be reliable.

Aerospace & Defense

Supporting major defense contractors, suppliers, and global aerospace supply chains.

Government Contracting

Federal, state, and regulated public-sector environments.

Manufacturing

Complex supplier networks and documentation-intensive operations.

Healthcare & Life Sciences

Supplier, regulatory, quality, and reporting requirements.

Energy

Operational, supplier, and regulatory compliance management.

Technology

Enterprise governance, supplier-risk management, and compliance automation.

Proven at scale. Built with discipline.

Organizations do not become resilient by accident. Supply chain resilience is the result of disciplined compliance processes, accurate supplier information, and structured evidence management.

25+

years of compliance experience

Battelle Supplier of the Year

Supply Chain Resilience Maturity Curve

Formal standing

- Small Disadvantaged Business (SAM.gov)
- ISO 27001 certified since 2018
- FedRAMP / CMMC-aligned control roadmap

Proven environments: U.S. Department of Defense contractor (2000–2005); aerospace, defense, procurement, and supplier-compliance expertise across GIDEP, eSRS, FAR/DFARS, ITAR, and FOCI; supported environments with 750+ licensed users across 400+ global sites; named Battelle Supplier of the Year (2023).

Our mission

Reduce the cost, effort, and risk associated with regulatory compliance while helping organizations remain continuously audit-ready.

Intelleges works behind the scenes to ensure clients have the systems, processes, and data required to meet obligations at enterprise and global scale.

Because the best audit outcome is the one that never becomes a problem.
